☎ +49 15560731320 📍 Berlin, Germany 🇮🇳 Nationality: Indian | 🛂 Visa: Student (Work permitted)

Profile

Backend engineer turned AI developer with 2+ years of professional experience building enterprise **Java/Spring Boot** systems and a growing focus on **GenAI**, **LLM applications**, and cloud automation. Active research and personal projects spanning **NLP pipelines**, async AI platforms, and **Infrastructure-as-Code** workflows.

Work Experience

Sovrano AI

06/2026 – Present

AI Trainer Analyst

Remote

- Owned end-to-end handling of assigned tickets, from creating structured training data to performing QA and reasoning-based evaluation, ensuring each output met accuracy, relevance, and safety standards.
- Applied domain expertise and critical reasoning in RLHF-style side-by-side evaluation to compare and rate model responses, annotating the stronger output and enforcing quality against gold-standard rubrics.

SRH University of Berlin

09/2025 – 04/2026

Research Assistant

Berlin, Germany

- Built and evaluated **NLP pipelines** for document classification and information extraction, applying **prompt engineering** and **RAG** techniques under Prof. Dr. Alexander Iliev, synthesizing research across cognitive science and **AI ethics** into structured academic writing.

Vrize India Pvt Ltd

09/2022 – 07/2024

Backend engineer

Bangalore, India

- Developed and maintained enterprise-level **Java/Spring Boot** applications (Zaxby's, Tonic), designing scalable **RESTful APIs** and backend **microservices** with seamless database integration across **MySQL** and **MongoDB**.
- Architected modular backend services implementing **Dependency Injection** and **AOP** patterns to improve maintainability and reduce coupling across service layers.
- Led API debugging and comprehensive unit/integration testing using **JUnit** and **Mockito**, identifying and resolving **critical bugs** and enforcing code quality standards through structured peer reviews.
- Automated deployment pipelines using **Docker** and **Jenkins** within **CI/CD** workflows, reducing manual release overhead and improving deployment reliability across environments.
- Contributed to **Agile sprint cycles**, consistently meeting milestones and recognized by senior engineers for technical ownership, proactive problem-solving, and cross-functional collaboration.

Education and Training

SRH University of Berlin

07/2024 – Expected 09/2026

M.Sc. Big Data and Artificial Intelligence (120 ECTS)

Berlin, Germany

- **Research Paper (Ohrid Conference)**: Built a stacking ensemble model combining LSTM, Random Forest, and XGBoost to explore how supplier stock movements relate to Tesla's stock price.

BMS College of Engineering, Bangalore

08/2018 – 07/2022

B.E. Information Science and Engineering – CGPA: 8.17

Bangalore, India

Skills

Programming	Python, Java, JavaScript/TypeScript, C, C++
AI/ML	TensorFlow, PyTorch, Scikit-learn, XGBoost, Keras, MLflow
NLP & GenAI	LSTMs, Transformers, BERT, RAG, Prompt Engineering, Claude API, LangChain, SSE Streaming, RLHF Evaluation
Data Science	NumPy, Pandas, Matplotlib, SciPy, OpenCV, DuckDB, SDV
Development	Spring Boot, FastAPI, RESTful APIs, Microservices, WebSockets, MySQL, MongoDB, Node.js
Cloud & DevOps	AWS, GCP, Azure, Terraform, Infrastructure-as-Code (IaC), Docker, Jenkins, CI/CD, GitHub Actions, Render, Vercel
Testing	JUnit, pytest, Model Validation, Cross-validation, Test Automation, Text-to-SQL Eval
Tools	Git, Jira, PowerBI, Tableau, VS Code, Confluence, Jupyter, Recharts

Projects

AsyncMeet (MANAN) – AI Async Decision-Making Platform Active Development

FastAPI, React/TypeScript, Claude Sonnet API, WebSockets, Python

- A **SaaS platform** replacing live meetings where teams submit input async via a guided **Claude Sonnet** chat that synthesizes responses into a decision summary on a real-time dashboard.

AWS Account Onboarding Automation [GitHub](#)

Terraform, GitHub Actions (OIDC), AWS, Python

- An **Infrastructure-as-Code** pipeline provisioning **IAM**, **S3**, and **VPC** resources from a single YAML config via **Terraform** and **GitHub Actions** with OIDC auth.

DataGrid – AI-Powered Analytics Platform [Live Demo](#)

FastAPI, React, DuckDB, Claude Sonnet/Haiku API, MLflow, SDV, Python

- Engineered a production **natural-language-to-SQL** platform with sandboxed execution, **SSE streaming**, a **Gaussian Copula** synthetic data engine, and an **MLflow** eval harness.

Certifications

Google Cloud (Skills Boost) [View Badges](#)

- MLOps for Generative AI, MLOps with Vertex AI Model Evaluation, Introduction to Security in the World of AI, Google Cloud Fundamentals Core Infrastructure and more.

AWS Educate [View Badges](#)

- Machine Learning Foundations, Machine Learning DeepRacer, Introduction to Generative AI, Introduction to Cloud 101 and more.

Language Skills

Mother tongue: Kannada

Other languages: English (C2), German (B1)
